

AKASH SONI

Backend Engineer | Java · Spring Boot · Microservices · Kafka · AWS
sameersoni396@gmail.com | +91 9685406249 | Bengaluru, KA | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Results-driven Backend Engineer with 3.4+ years at Tata Elxsi, specializing in Java, Spring Boot, and cloud-native microservices. Delivered 30% throughput gains, 25% latency reduction, and scaled test coverage to 77%. AWS Certified Solutions Architect & Confluent Certified Kafka Engineer. Domain expertise in healthcare interoperability (FHIR R4, EHR/EMR). Passionate about scalable, high-reliability backend systems.

TECHNICAL SKILLS

Languages & Frameworks: Java, Python, Spring Boot, Spring MVC, Spring Data JPA, Spring Security, Hibernate, Maven

Messaging & Cloud: Apache Kafka, AWS (EC2, S3, RDS, Lambda, API Gateway), Docker, Jenkins, CI/CD

Databases: MySQL, PostgreSQL, SQL (Advanced)

Testing & Quality: JUnit, TestNG, Mockito, JMeter, TDD, SonarQube

Architecture & Tools: Microservices, REST API Design, Event-Driven Architecture, System Design, Git, Postman, Swagger, JIRA, Agile/Scrum

PROFESSIONAL EXPERIENCE

Tata Elxsi Ltd. · *Software Developer — Backend Engineering* Bengaluru, KA Jan 2023 – Present

- Architected microservices-based backend using Spring Boot, decomposing monolith into independently deployable services; reduced cross-service dependencies by 40% and improved system modularity.
- Engineered scalable RESTful API gateway boosting system throughput by 30% and cutting API response latency by 25% under peak load; integrated third-party APIs for real-time data access.
- Optimized application performance by 45% through code refactoring, async processing patterns, and Kafka-based event pipelines; improved legacy module reliability significantly.
- Scaled test coverage from <50% to 77% using JUnit, Mockito & TestNG; reduced production defects by 20%. Implemented CI/CD pipelines (Jenkins + Docker), cutting deployment failures by 30%.
- Awarded Ownership Award, Project Excellence Award & Extra Mile Award for outstanding backend delivery and cross-team impact.

KEY PROJECTS

FHIR R4 Healthcare Interoperability Platform · *Java, Spring Boot, PostgreSQL, FHIR R4, EHR Integration*

- Built FHIR R4-compliant microservices enabling secure data exchange across hospitals, insurers & remote devices for diabetic patient management; implemented async pipelines for real-time risk stratification.
- Designed HIPAA-aligned REST APIs integrating EHR/EMR systems, automating care coordination and patient vitals ingestion with low-latency inter-service communication.

Telemedicine Platform — Virtual Consultations · *Java, Spring Boot, PostgreSQL, WebSocket, Payment Gateway*

- Developed real-time chat (WebSocket), video consultation, and push notification backend; improved patient follow-up rates by 35%. Integrated payment gateway with idempotency and retry handling.
- Optimized N+1 query patterns and introduced caching strategies, reducing average API response time by 28%.

Digital Health Platform — Unified Patient & Provider Care · *Java, Spring Boot, MySQL, JWT, RBAC*

- Designed modular microservices for appointment scheduling, patient management & provider dashboards with JWT-based auth and RBAC; improved API response times by 35% under concurrent load.

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate
- Confluent Data Streaming Engineer (Kafka)
- REST API Intermediate (HackerRank)
- SQL Advanced (HackerRank)
- AWS Essential Training (LinkedIn Learning)

EDUCATION

B.Tech, Information Technology — Madhav Institute of Technology & Science, Gwalior

CGPA: 7.77 | Jun 2022
