Education

Madhav institute of technology and science
Information Technology Btech
CGPA: 7.77

Gwalior
July/2018 - June/2022

Jawahar Navodaya Vidyalaya
PCM 12th | PCM 10th
Percentage: 81.6% | 10 CGPA

Bari
July/2014 - May/2015 | July/2015 - May/2017

Experience

Tata Elxsi Ltd. | Software Developer

Bengaluru, Karnataka | Jan/2023 - Present

- Designed and implemented a microservices architecture, enhancing modularity and reducing cross-service dependencies.
- Improved application performance by 45% through code optimization, refactoring legacy modules, and implementing asynchronous processing.
- Delivered a high-performing web application with 90% user satisfaction, integrating third-party APIs for real-time data access and extended functionality.
- Increased code coverage to 77% with automated unit and integration tests, reducing production issues by 20%.
- Developed an API gateway and scalable RESTful backend using Spring Boot and microservices, improving system throughput by 30% and reducing latency by 25%.
- Collaborated with cross-functional teams for CI/CD implementation using Jenkins and Docker, ensuring smoother deployments and rollback management.

Skills

Programming Languages: Java

Libraries/Frameworks: Spring Boot, Spring MVC, Spring Data JPA, Kafka, Security, Hibernate, Maven, Mockito, JUnit, TestNg, JMeter Load Test, Amazon Q

Databases: SQL, MySql, PostgresSql

Cloud & DevOps Tools: AWS (EC2, S3, RDS, Lambda), Docker, Jenkins, SonarQube, CI/CD Pipelines, API Gateway, Swagger

Tools / Platforms: VS Code, Git, Postman, Eclipse Ide, Jira, JMeter

Architectural & Skills: Microservices Architecture, System Design, Design Patterns), Agile & Scrum Methodologies, Test-Driven Development (TDD)

Projects

Project 1

Java, Spring Boot,MySql

- Built a full-stack digital health platform offering unified access for patients and healthcare providers across multiple care channels.
- Designed modular microservices for appointment scheduling, patient management, and provider dashboards, improving efficiency and scalability.
- Implemented secure RESTful APIs and JWT-based authentication for data protection and privacy compliance.
- Enhanced system performance and load handling through Spring Boot optimizations and API response tuning.

Project 2

Java, Spring Boot, PostgresSql

- Developed a cross-platform telemedicine app connecting patients and doctors for virtual consultations and prescription management.
- Implemented real-time chat, video call, and push notification features, improving patient follow-up rates by 35%.
- Designed RESTful backend services with secure authentication, payment gateway integration, and appointment scheduling.
- Built a React Native mobile UI for Android and iOS, ensuring smooth navigation and fast response times.
- Optimized API calls and database queries to minimize load time and improve overall app reliability.

Project 3

Java, Spring Boot, PostgreSQL

- Developed a FHIR R4-compliant integration platform enabling seamless data exchange between hospitals, insurance providers, and healthcare applications for remote diabetes management and value-based care delivery.
- Designed and implemented RESTful APIs and microservices to securely transmit patient vitals, medical history, and device data across systems while maintaining interoperability and HIPAA-aligned security.
- Integrated with EHR/EMR systems and third-party healthcare APIs to automate care coordination, real-time monitoring, and risk stratification for diabetic patients.
- Enhanced system scalability and performance by optimizing Spring Boot services, implementing asynchronous data processing, and ensuring low-latency communication between partner systems.

Certifications

AWS Solution Architect Associate – Amazon Web Service [Credentials](#)

AWS Essential Training for Developers - LinkedIn Learning. [Credentials](#)

Data Streaming Engineer: Certified SME – Confluent [Credentials](#)

Programming Foundations: APIs and Web Services - LinkedIn Learning.

Rest API (Intermediate) - HackerRank

SQL Advance – HackerRank

Honors & Awards

Honored with the Ownership Award and Project Excellence Award by my manager, as well as the Extra Mile Award by my team lead, for my outstanding contribution to the project throughout its duration.
